CREDITS

Included media retains its original license. Adaptations include runtime mesh/texture conversion, LODs, animation sampling, gibs and audio conversion. No endorsement is implied. Full supplied software and media license notices remain in licenses/ and the root notice files.

announcer

Antti Saari (recording); TripleSnail (editing) / CC-BY-3.0

https://opengameart.org/content/announcer-kill-sounds

Selected voices downmixed to mono, converted to 48 kHz PCM16 WAV with gain reduction and 2ms edge fades.

battlesuit

PhilZero (concept); Ihdc (model); Stannum (texture); gavlig (animation); Ishq (integration credit) / CC-BY-SA-3.0

https://wiki.unvanquished.net/wiki/Credits/Media

Sampled skeletal animations baked to FBM1; coordinates rotated/scaled; UV V flipped. Two lower-detail meshes derived by triangle-edge clustering. FBS1 additionally retains the70-joint bind rig, normalized four-weight skin and696 original joint poses across ten clips for runtime skeletal animation; no new source art or upstream program code. Fifteen closed rigid skin-weight regions retain source exterior triangles and UVs; 52 authored poses are fitted to jointed corpse segment transforms.

blood

Ragnar Random / CC0-1.0

https://opengameart.org/content/bloodspatter-and-gibs

PNG atlas copied unchanged.

convoy-architecture

Fragbaz / Original project asset

Original repair-convoy annex architecture, rounded conduits, wall panels and route lamps generated as four static FBM1 batches. Existing industrial textures are reused unchanged and remain credited in their existing media groups.

Permanent cover and routes use authored convex collision. Thin trim, wall conduits and lamps are decorative; cyan and amber lamps are intentionally unlit. No runtime tessellation.

crux-architecture

Fragbaz / Original project asset

Bevelled carved stone relief authored in assets/environment/build-architecture.mjs. Decorative mesh only; tower collision stays convex and simple.

crux-round-architecture

Fragbaz / Original project asset

Smooth stone tower roundels and ground-following relay inlays authored by maps/build-crux.mjs with assets/environment/round-mesh.mjs and crux-round-details.mjs. Static FBM1 triangles and normals; no runtime tessellation. Sandstone texture retains its separate Poly Haven attribution.

cyborg-pain

Vinrax / CC-BY-3.0

https://opengameart.org/content/cyborg-hurt

Recorded cyborg reaction downmixed to mono, resampled to48kHz PCM16, normalized and edge faded.

dragoon

Khaos (concept); RXMT (model and texture); Enneract (texture edit); Viech (source glow credit); gavlig (animation) / CC-BY-SA-3.0

https://wiki.unvanquished.net/wiki/Credits/Media

Original IQE importer bakes 52 animation samples at nominal 1.65 m bind height. Seven unweighted mouth-detail vertices inherit nearest valid source weights within0.1 source unit (about1.1cm); source file unchanged. Three LODs, original texture and six closed bone-segmented anatomical gibs. No source game code, shaders or configurations used.

dynamo-architecture

Fragbaz / Original project asset

Original DYNAMO facility pipework and collars, generated as smooth FBM1 meshes from deterministic cylinder and annular-arc primitives. No third-party geometry or code imported. Texture media is reused unchanged and remains credited in its existing groups.

Four inscribed convex hulls provide inexpensive pipe collision; collars and overhead arches are decorative. Smooth normals are precomputed; no runtime tessellation.

female-pain

AuraVoice / Nocturnal_Vanguard / CC0-1.0

https://opengameart.org/content/female-hurt-grunts-groans

Seven separate recorded takes cropped at documented silence boundaries, normalized and edge faded to48kHz mono PCM16. Longer groans also serve terminal reactions; no separate death recording claimed.

grunts

thebardofblasphemy / CC0-1.0

https://opengameart.org/content/grunts-male-death-and-pain

Source segment 0.42-2.04 seconds extracted; resampled and gain reduced; 2ms edge fades; PCM16 WAV.

hands

Angelo; Stannum; RXMT / CC-BY-SA-3.0

https://wiki.unvanquished.net/wiki/Credits/Media

Texture files copied unchanged. Group credit follows the upstream glove/edited-armour credit entry.

human-pain

Michel Baradari; qubodup (submission) / CC-BY-3.0

https://opengameart.org/content/11-male-human-paindeath-sounds

Eleven recorded takes resampled to48kHz mono PCM16, normalized and edge faded. Mechanical variants additionally use original pitch0.83/ring-modulation processing; these are adapted recordings, not newly recorded robot performances.

kenney

Kenney Vleugels (Kenney.nl); Filter templates: Indigo Ray, Craig Nisbet, Zoltan Erdokovy, Heliagon, ThreeDee, Killst4r, Tim2501 / CC0-1.0

https://kenney.nl/assets/particle-pack

Five transparent PNG images selected from Particle Pack 1.1; pixels unchanged. Unity samples not extracted or used.

lasgun

chris807 / CC-BY-SA-4.0

https://wiki.unvanquished.net/wiki/Credits/Media

Authored arm/gun/display skeletal animation baked to FBM1, coordinate rotation/scale and UV V flip. Textures copied.

lucifer-cannon

Stannum / CC-BY-SA-3.0

https://wiki.unvanquished.net/wiki/Credits/Media

MD5 skeletal poses baked to FBM1; smooth normals recomputed; coordinates rotated/scaled; WebP decoded to PNG.

male

Angelo (model/texture); Stannum (armor touch-up); RXMT (edited glove texture) / CC-BY-SA-3.0

https://wiki.unvanquished.net/wiki/Credits/Media

Separate armor/body/head; helmet excluded; scaled skeletal animations baked; normalized incomplete vertex weights; nonuniform bone scaling retained; three distance LODs; bone-segmented closed anatomical gibs. JPEG head decoded to PNG. Fifteen closed rigid skin-weight regions retain source exterior triangles and UVs; 52 authored poses are fitted to jointed corpse segment transforms.

mantis

Sewer Hrehorowicz (concept); Cupside (model); Stannum (texture) / CC-BY-SA-3.0

https://wiki.unvanquished.net/wiki/Credits/Media

Skeletal animations baked at1.2m height; three distance LODs; bone-segmented closed anatomical gibs.

marauder

Sewer Hrehorowicz (concept); Osiris (model/texture); Russ Briggeman Jr. (animation) / CC-BY-SA-2.5

https://wiki.unvanquished.net/wiki/Credits/Media

Body/legs skeletal animations baked at1.65m height; three distance LODs; bone-segmented closed anatomical gibs.

mass-driver

Stannum / CC-BY-SA-3.0

https://wiki.unvanquished.net/wiki/Credits/Media

Authored arm/gun/core/lens skeletal poses sampled by original MD5 importer; smooth normals recomputed; coordinate rotation/scale. Lens JPEG decoded to PNG.

minigun

extreazz (egor147852), model and textures; DolceTriade (Unvanquished media integration) / CC-BY-4.0

https://sketchfab.com/3d-models/minigun-xm214-a-93c57731ed8648e99c359c865f748888

XM214-A model from pinned media repo; original IQE affine parser bakes idle/fire/raise frames; scale and coordinate rotation; WebP diffuse images decoded to PNG. Its six gun meshes retain CC BY4. Added arm meshes have separate CC BY-SA3 provenance in the minigun-arms group and per-part model metadata.

minigun-arms

Stannum (source rifle arms, animation and soldier armor); Angelo (soldier upper-arm model and body texture); RXMT (source glove credit); Ishq (source media integration credit); Fragbaz (original arm and finger IK retarget) / CC-BY-SA-3.0

https://wiki.unvanquished.net/wiki/Credits/Media

Original two-bone arm IK fits existing licensed forearm/hand meshes to measured minigun handles without stretching. Four finger chains per hand re-solved around each handle, preserving phalanx lengths; authored opposing thumbs retained. Actual soldier upper-arm body and shoulder armor triangles are selected by source bone weights, rigidly aligned shoulder-to-elbow, and joined behind the fitted forearms so wide-FOV presentation has no floating elbow cut. Original UVs and textures preserved. Baked16 gun-root poses match idle, fire and raise. Separate arm-derived files retain CC BY-SA3; original minigun meshes remain CC BY4.

monster-pain

Michel Baradari; qubodup (submission) / CC-BY-3.0

https://opengameart.org/content/15-monster-gruntpaindeath-sounds

Thirteen recorded pain/grunt/death takes resampled to48kHz mono PCM16, normalized and edge faded.

music

Bogart VGM / CC-BY-4.0

https://opengameart.org/content/german-industrial-metal

Full track resampled to 48 kHz stereo PCM16, gain reduction and one-second edge fades.

nasa-blue-marble

NASA Earth Observatory; Reto Stoeckli / NASA media usage guidelines

https://science.nasa.gov/earth/earth-observatory/blue-marble-next-generation/base-topography/

https://www.nasa.gov/nasa-brand-center/images-and-media/

January 2004 topographic Blue Marble resized to 2048x1024 RGB8 for an attributed planet backdrop. No NASA insignia or endorsement.

organic-gibs

Paul Wortmann; Scribe (heart and lungs source); MakeHuman contributors / CC0-1.0

https://opengameart.org/content/3d-dungeon-debris-gibs

Heart, lungs and hand converted from OBJ to FBM1, Y-up to Z-up, scale 0.3 and recentered. Original diffuse PNG retained. Source archive, Blender, OBJ and credits preserved; no game code imported.

pk01

Philip 'Blazeeer' Klevestav / CC-BY-3.0

http://www.philipk.net/

Selected diffuse textures copied unchanged.

polyhaven-environment

Amal Kumar; Charlotte Baglioni; Rob Tuytel / CC0-1.0

https://polyhaven.com/

https://polyhaven.com/license

Seven 1K diffuse PNGs converted to 8-bit RGB without resizing or visual edits; verified original PNGs retained. Individual authors, source URLs and independent SHA-256 pins are in the catalog. Normal and roughness maps are documented but not rendered.

pulse-rifle

Stannum (model/animation); Ishq (integration credit) / CC-BY-SA-3.0

https://wiki.unvanquished.net/wiki/Credits/Media

Sampled skeletal animations baked to FBM1; coordinates rotated/scaled; UV V flipped; textures unchanged.

q009

Q009 / CC-BY-SA-3.0

https://opengameart.org/content/q009s-weapon-sounds

Selected sounds downmixed to mono, resampled 44.1 to 48 kHz, peak-limited by gain reduction, 2ms edge fades, PCM16 WAV encoding.

rajdhani

Indian Type Foundry (2014) / OFL-1.1

https://github.com/google/fonts/tree/e7db6ca603fd4862010383ff17ffd6cc4ffac1c0/ofl/rajdhani

Unmodified Rajdhani Bold and SemiBold TTF files copied from pinned Google Fonts repository. Original font license and metadata preserved. No Quake typeface or logo used.

stream-protector

Vasian-Digital3D (https://sketchfab.com/Vasian-Digital3D) / CC-BY-4.0

https://sketchfab.com/3d-models/stream-protector-883e1ad8ff21488aa9bb7daf6e8cf8eb

https://creativecommons.org/licenses/by/4.0/

Original Blender evaluated-mesh bake. One uniform scale, source +X to +Y rotation, authored root XY removed per frame, UV V flipped. No joint scaling or synthetic skeletal actions.

Source is a broad six-legged machine. Thin decorative leg tips extend slightly outside its 0.72m gameplay radius. No authored death, jump or pain action: reserved slots hold a source idle pose. Corpse collapse is rigid presentation only.

switchyard-architecture

Fragbaz / Original project asset

Original industrial architecture and art, authored as measured convex collision plus beveled static FBM1 batches. Existing textures remain separately credited under their own media groups. Constant white material data and the tiny authored night-sky gradient lookup are original deterministic PNGs. Physical signage uses retained outlines from the existing OFL-1.1 Rajdhani Bold font, with its original font source/notice unchanged. Deterministic ambient/direct-sun visibility against authored solids is stored in vertex-normal length; no runtime geometry or light bake. Painted-steel albedo was generated with the built-in image_gen tool; full prompt, source pixels and SHA-256 are retained in assets/source/switchyard/painted-steel-generation.json.

Decorative piping, bevels and distant skyline use the simple structural collision beneath them; thin trim is not a separate collider. Static visibility uses five hemisphere rays and one sunlight ray per vertex, not a per-pixel lightmap. Cyan, amber, physical lettering and backdrop batches are intentionally unlit.

wet-impacts

Independent.nu; qubodup (submission) / CC0-1.0

https://opengameart.org/content/8-wet-squish-slurp-impacts

First impact downmixed, resampled and gain reduced; 2ms edge fades; PCM16 WAV.

Alpha substitutions

The second humanoid slot uses the credited soldier with matching animation and ragdoll data. Longbow uses the Mass Driver presentation. Timer/end cues reuse the Q009 pickup cue. Nyx, Vortex, commercial tribute maps, Duke display media and Microsoft synthetic speech are excluded. Linked software: Goose/goose_gfx (Apache 2.0), SDL (zlib), volk/VMA (MIT), Vulkan headers, Nuklear/stb and the bundled .NET runtime. Exact notices are supplied.
